DETAILED ACTION

1. This action is responsive to communications of application received 12/05/2003.
2. The disposition of the claims is as follows: claims 1 - 34 are pending in the application.

Claims 1, 21, 30 and 31 are independent claims.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 31 recites the limitation "the colors" in fourth line. There is insufficient antecedent basis for this limitation in the claim.

(Examiner's note:

Invention most likely meant line four to read:

"first pixel groups comprising 4 dots having one of each colors red, green and blue")

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 2676

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-31 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 2 of U.S. Patent No. 6,661,429 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because “first pixels” and “second pixels” correspond respectively to “static pixel groups” and “dynamic pixel groups”; and “symmetrically enhanced resolution in a vertical and a horizontal direction” corresponds to “enhanced resolution in a vertical and/or a horizontal direction”.
